Education

Arizona State University - Tempe, AZ, USA Aug 2024 – May 2026
Master of Science in Computer Science - GPA: 3.92/4.0
◦ **Coursework:** Distributed Systems, Cloud Computing, Algorithms, Databases, Machine Learning, NLP, HCI, Agentic AI

R.V. College of Engineering - Bangalore, KA, India Aug 2019 – June 2023
Bachelor of Engineering in Electronics and Telecommunication - GPA: 3.54/4.0
◦ **Coursework:** Object Oriented Programming, Data Structures and Algorithms, Web Development, Cryptography and Network Security

Experience

Software Developer Intern June 2025 – Jan 2026
Thropic Technology Denver, CO, USA
◦ Architected and owned an **automated scoring backend** integrating **ESPN APIs (NFL, NBA, NCAA)**, eliminating manual validation and powering a production admin platform used across live campaigns.
◦ Designed, optimized, and maintained relational **Postgres schemas** for players, matches, and scoring data, **reducing query latency by 40%** and improving analytics reliability.
◦ Built **core backend workflows** replacing **third-party tooling** with internal services, enabling self-serve game launches; owned **QA and release stability** across critical launch paths.
◦ Integrated **Claude** to automate marketing and quiz-generation workflows.
◦ Led **0 to 1 backend platform** development supporting **30+ fundraising deployments**, scaling to **10K+ users** while driving **3×** engagement and **2×** session time. [View Website](#) 

Software Developer Intern June 2025 – Aug 2025
Vantion.ai Phoenix, AZ, USA
◦ Refactored a **monolithic system into service-oriented architecture**, separating **FastAPI backend services** from a Next.js frontend; resolved **12+ cross-service issues** and cut **deployment time by 90%**.
◦ Implemented **CI/CD pipelines** with automated preview environments and **sub-minute build times**, significantly increasing **release velocity** across staging and production.
◦ Redesigned **backend APIs** after **Supabase schema migration**, improving auth and **cutting dev time by 40%**.
◦ Defined and versioned **backend APIs and schema changes** for the Canvas feature, enabling scalable rollout.

Associate Software Engineer July 2023 – July 2024
Telstra Bangalore, KA, India
◦ Developed and maintained **backend services** for a **Kafka-based** messaging platform using **Node.js** and **MongoDB**, reliably supporting **10K+ messages per day**.
◦ Improved system reliability and throughput using **Kafka queues** and **Docker-based deployments**.
◦ Automated 850+ cloud backup jobs with **Python** across **NetApp** and **Commvault**, improving success rate by 15%.
◦ Provisioned **NetApp Storage Virtual Machines**, applying **QoS policies** to maintain **consistent IOPS**.

Software Engineer Intern Sept 2021 – Oct 2021
R.V. College of Engineering - Cisco Bangalore, KA, India
◦ Built a **Flask-based NLP tool (NLTK, entity recognition)** for campus Q&A, handling more than **100 daily queries** and improving accuracy through a **feedback loop**.

Publications

-
- Lane and Traffic Sign Detection for ADAS using Deep Learning in CARLA Simulator, IJRITCC (2023). ([Read](#) )
 - Deep Learning-based Campus Assistive Chatbot, 2021 IEEE CSITSS. ([Read](#) )

Projects

Elastic Face Recognition System – Cloud + ML + IaaS (ASU) Mar 2025 – May 2025
◦ Deployed a **scalable backend inference service** using **FastAPI, PyTorch, and AWS**, serving **100+ concurrent users** with sub-900ms latency via **autoscaling EC2** and **S3-backed infrastructure**.

Distributed Counter Strike 2 Analytics Platform – Distributed Databases (ASU) Sep 2025 – Dec 2025
◦ Built a **Kafka-based ingestion pipeline** backed by a **replicated CockroachDB cluster**, enabling **fault-tolerant, scalable analytics** with real-time monitoring via **Grafana**.

Context-Aware Summarization Agents – NLP + Prompt Engineering (ASU) Feb 2025 – May 2025
◦ Built a **multi-agent backend service** integrating **OpenAI and Gemini APIs**, improving answer accuracy by **25%** through orchestration logic, **prompt design**, and evaluation pipelines.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++
Backend & APIs: FastAPI, Flask, Node.js, REST APIs, Supabase, PostgreSQL, MongoDB
Distributed Systems & Data: Kafka, CockroachDB (Distributed SQL), Schema Design, Replication, Fault Tolerance
Cloud & Infrastructure: AWS (EC2, S3, SQS, Lambda), Docker, Linux, CI/CD, Git
AI & Applied ML: LLMs (OpenAI, Gemini, Claude), PyTorch, TensorFlow, Scikit-learn, Pandas
