

Hithaishi Surendra

Tempe, AZ hsurendr@asu.edu (480)742-6031 [linkedin.com/hithaishi-surendra](https://www.linkedin.com/in/hithaishi-surendra) github.com/hithaishisurendra

Education

Arizona State University - Tempe, AZ, USA

Aug 2024 – May 2026

Master of Science in Computer Science - GPA: 3.92/4.0

- Coursework: Data Mining, Data Visualization, Statistical Machine Learning, Agentic AI, Natural Language Processing, HCI

R.V. College of Engineering - Bangalore, KA, India

Aug 2019 – June 2023

Bachelor of Engineering in Electronics and Telecommunication - GPA: 3.54/4.0

- Coursework: Object Oriented Programming, Data Structures and Algorithms, Web Development, Cryptography and Network Security

Experience

Software Developer Intern (Part-Time)

June 2025 – Jan 2026

Thropic Technology

Denver, CO, USA

- Built automated data pipelines integrating **ESPN APIs (NFL, NBA, NCAA)**, ingesting and normalizing live sports data into **Postgres** to power real-time scoring analytics across **30+ campaigns**
- Designed and optimized relational schemas for players, matches, and scoring events, reducing **query latency by 40%** and improving analytics reliability
- Built internal analytics dashboards replacing manual validation, enabling **self-serve reporting** for non-technical stakeholders across live fundraising workflows
- Integrated **Claude** into internal marketing and quiz-generation workflows, automating **content creation** and reducing **turnaround time** for new campaigns

Software Developer Intern (Part-Time)

June 2025 – Aug 2025

Vantion.ai

Phoenix, AZ, USA

- Redesigned backend APIs and database schema after a **Supabase** migration, improving data consistency and cutting **development time by 40%**
- Set up **CI/CD pipelines** with automated preview environments and **sub-minute build times**, increasing release velocity across staging and production
- Refactored monolithic system into **service-oriented architecture**, resolving **12+ integration issues** and cutting **deployment time by 90%**

Associate Software Engineer

July 2023 – July 2024

Telstra

Bangalore, KA, India

- Automated **850+ cloud backup workflows** using **Python** across NetApp and Commvault systems, improving **job success rate by 15%** through scripting and monitoring
- Built and maintained backend services for a **Kafka-based data platform** using Node.js and MongoDB, supporting **10K+ messages/day** with stable uptime
- Provisioned **NetApp Storage Virtual Machines** and applied **QoS policies** to maintain consistent IOPS across cloud storage infrastructure

Publications

Lane and Traffic Sign Detection for ADAS using Deep Learning ([Read](#) [🔗](#))

IJRITCC, 2023

- Developed object detection models for autonomous driving using deep learning (**CNNs**) in the **CARLA** simulator; covered **dataset preparation, model training, and performance evaluation** on real-world traffic scenarios

Deep Learning-based Campus Assistive Chatbot ([Read](#) [🔗](#))

IEEE CSITSS, 2021

- Built and evaluated an **NLP classification pipeline** using **NLTK** and entity recognition; designed feedback loop for iterative accuracy improvement, handling **100+ daily queries**

Projects

Stock Market Movement Prediction – Bi-LSTM, XGBoost, Python (ASU)

Sept 2024 – Dec 2024

- Built an end-to-end **ML pipeline** on the **Optiver NASDAQ dataset (5.2M rows, 200 stocks)** for binary classification of 60-second price movement direction
- Engineered **lagged features, rolling statistics, bid-ask spread**, and log transforms; benchmarked Random Forest and XGBoost baselines before achieving **84% accuracy** and **0.833 F1** with **Bi-LSTM**

Context-Aware Summarization Agents – NLP, LLMs (OpenAI, Gemini) (ASU)

Feb 2025 – May 2025

- Built **multi-agent** summarization system for **financial QA (TATQA)**, improving accuracy by **25%** over single-agent baseline through **orchestration logic** and prompt design

Elastic Face Recognition – FastAPI, PyTorch, AWS (ASU)

Mar 2025 – May 2025

- Deployed scalable **ML inference pipeline** on **AWS (EC2 autoscaling, S3, SQS)**, serving **100+ concurrent** users with **sub-900ms latency**

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript

Data and ML: Pandas, NumPy, PySpark, Scikit-learn, PyTorch, Regression, Classification, Feature Engineering, EDA, Statistical Modeling, Causal Inference, Data Wrangling, Optimization

Visualization: Matplotlib, Seaborn, D3.js, Tableau

Databases: PostgreSQL, MongoDB, CockroachDB, Supabase

Cloud and Tools: AWS (EC2, S3, SQS, Lambda), Databricks, Docker, Git, Jupyter, CI/CD
