Tempe, AZ hsurendr@asu.edu (480)742-6031 [linkedin.com/hithaishi-surendra](https://www.linkedin.com/in/hithaishi-surendra) [Google Scholar](#)

Education

Arizona State University - Tempe, AZ, USA Aug 2024 – May 2026
Master of Science in Computer Science - GPA: 3.92/4.0
◦ **Coursework:** Distributed Systems, Cloud Computing, Data Mining, Machine Learning, Natural Language Processing, Agentic AI

R.V. College of Engineering - Bangalore, KA, India Aug 2019 – June 2023
Bachelor of Engineering in Electronics and Telecommunication - GPA: 3.54/4.0

Experience

Software Developer Intern June 2025 – Jan 2026
Thropic Denver, CO, USA
◦ Built automated scoring backend integrating **ESPN APIs (NFL, NBA, NCAA)**, eliminating manual validation and powering the admin dashboard.
◦ Designed and optimized **Postgres schemas** for players, matches, and scoring, reducing **query latency by 40%**.
◦ Replaced **Feathery** with internal dashboard built from scratch, enabling self-serve game launches.
◦ Integrated **Claude** into marketing workflows, automating content creation and reducing turnaround time.
◦ Led **0 to 1** website (**React, Next.js, Tailwind**), scaling to **10K+ users**, **3× engagement**, **2× session time**.

Software Developer Intern June 2025 – Aug 2025
Vantion Phoenix, AZ, USA
◦ Split a **monolithic application** into separate **FastAPI (backend)** and **Next.js (frontend)** services, fixing more than **12 integration issues** and reducing deployment time by **90%**.
◦ Set up **CI/CD pipelines** on Vercel with automated previews and **sub-minute builds**; used **Claude Code, Cursor, and Copilot** to accelerate development.
◦ Updated data handling and APIs after a Supabase schema redesign, improving auth and cutting dev time by 40%.

Associate Software Engineer July 2023 – July 2024
Telstra Bangalore, KA, India
◦ Built **backend services** for a **Kafka-based messaging platform** using **Node.js** and **MongoDB**, supporting over **10K messages per day** with stable uptime.
◦ Improved reliability and scalability by using **Kafka queues** and **containerized deployments with Docker**.
◦ Automated **850+ cloud backups** with **Python** across **NetApp** and **Commvault**, improving success rate by **15%**.
◦ Provisioned **NetApp Storage Virtual Machines** and applied **QoS policies** to maintain steady **IOPS**.

Publications

Lane and Traffic Sign Detection for ADAS using Deep Learning ([Read](#)) IJRITCC, 2023
◦ Implemented **SegNet** for semantic segmentation (lane detection, **94.80% accuracy**, **93.33% mAP**) and **YOLO** for traffic sign detection (**95.56% accuracy**) in the **CARLA** autonomous driving simulator.
◦ Created custom datasets of **864** (lane) and **612** (traffic sign) images across multiple towns and weather conditions; outperformed **Faster R-CNN** and **R-FCN** baselines.

Deep Learning-based Campus Assistive Chatbot ([Read](#)) IEEE CSITSS, 2021
◦ Built an **NLP pipeline** using **NLTK**, **Bag of Words**, and a **Sequential Neural Network (ReLU + Softmax)** for intent classification, achieving **89% accuracy** across 100 test interactions.
◦ Integrated **Google Maps** navigation and a feedback loop for iterative accuracy improvement; deployed on college website handling **100+ daily queries** as part of **Cisco internship** at R.V. College of Engineering.

Projects

Elastic Face Recognition Pipeline (ASU) Mar 2025 – May 2025
◦ Deployed **face recognition inference service** using **FastAPI** and **PyTorch** on **AWS EC2** with autoscaling, **S3** storage, and **SQS** task queues.
◦ Served **100+ concurrent users** with **sub-900ms latency** under load via **AWS autoscaling**.

Evolution of F1 (ASU) [View Website](#) Mar 2025 – May 2025
◦ Built an **interactive**, race track-style data visualization to explore F1 safety trends and pit strategies using **JavaScript, D3.js, and SVG**, with **custom animations** and scrollytelling interactions.

Context-Aware Summarization Agents (ASU) Feb 2025 – May 2025
◦ Built a **multi-agent summarization system** using **OpenAI and Gemini APIs** for financial QA, improving **accuracy by 25%** over a single-agent baseline through **prompt design** and **performance monitoring**.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL
Frontend: React, Next.js, HTML5, CSS3, Tailwind, D3.js
Backend & APIs: FastAPI, Flask, Node.js, REST APIs, Supabase, PostgreSQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, SQS, Lambda), GCP, Docker, Vercel, Git, CI/CD
AI & Data: LLMs (OpenAI, Gemini, Claude), Prompt Engineering, PyTorch, Tensorflow, Scikit-learn
